

HUMAN SIEM

How many employees aren't familiar with the password policy in your organization?

Who are the employees who tried to connect removable media to your network?

Do your employees know which websites are allowed/not allowed to surf?

How we can deal with the **human factor** against the various cyber attacks?

EVERYONE IS DOING "CYBERSECURITY AWARENESS TRAINING"

Q-LOG Human SIEM
IS MUCH MORE THAN THAT!

Q-LOG Human SIEM

- ✓ Monitoring, documentation and analysis of cybersecurity events at the employee level.
- ✓ Tutorials are personally adapted (automatically) to the employee, according to his actions performed in violation of the policy.
- ✓ User permissions and blocked, automatically, depending on the risk of the employee's behavior.

- The leading and well-known Q-LOG system in the field of "cyber security awareness training" also contains 8 modules:

Email/SMS/WEB/WIFI phishing simulations, A variety of tutorials - open for editing or closed (Interactive), distribution of a burst out messages / questions.

- Protected by a patent.
- Possible to be implemented on an On Premise server or as a SAAS cloud service.

Q-LOG HUMAN SIEM

THE NEXT GENERATION OF CYBER SECURITY AWARENESS TRAINING
